SUMMARY

Results-driven Full Stack Developer with 8+ years of experience in designing, developing, and deploying highly scalable, modern web applications. Expertise in JavaScript, Node.js, Java, Spring Boot and AWS. Strong knowledge of microservices architecture, API management, and DevOps practices. Currently focused on modernizing a legacy enterprise system at Boeing while keeping production stable for thousands of users. Recognized for achieving project goals and exceeding expectations in cross-functional team environments.

SKILLS

Backend and Core: Java, Node.js, Spring Boot, Spring MVC, JavaScript, Express.js, REST API, Microservices, OOPs

Frontend: JavaScript, TypeScript, React.js, Vue.js, Angular, CSS3, HTML5, SASS, Redux

Databases and Brokers: PostgreSQL, MySQL, MongoDB, Redis, Apache Kafka, RabbitMQ

Cloud and DevOps: AWS (EC2, S3, RDS, Lambda), Docker, Kubernetes, Jenkins, GitLab CI/CD, Nginx

Tools and Testing: Git, GitLab, Bitbucket, Jest, Mocha, Chai, Jira, Confluence, SonarQube, Postman

Methodologies: Agile, Scrum, CI/CD, Code Review, Technical Design

WORK EXPERIENCE

Sr. Full Stack Developer

Boeing India | Sep 2025 - Present | Bengaluru, India

Project: CMES

- Took ownership of a legacy enterprise app with 100+ JSP pages and built a step-by-step plan to modernize it without breaking anything in production.
- Went through the entire ticketing system code, mapped out how each module connects, and wrote documentation so new team members could get up to speed faster.
- Set up coding guidelines and a review checklist for the team. This helped us catch issues early and keep the codebase clean with developers.
- Worked directly with business users to understand what they needed, turned those into clear specs, and delivered features in priority order.

Full Stack Developer - Consultant

T-Systems ICT India Pvt Ltd | Dec 2021 - Sep 2025 | Bengaluru, India

Projects: LogFit CORS, HALO

- Joined the CORS project midway and took it all the way to production release across Germany, UK, Spain, and 3 other European markets. Handled everything from backend logic to deployment.

- Fixed a major performance issue where dealers with large datasets were timing out. Rewrote the queries, added batch processing, and split the data load, which brought response times down significantly.
- Migrated the entire frontend from an older design system to Xentry Theme. Touched every page, coordinated with designers, and kept things working during the transition.
- Built a two-way sync feature for asset commits so changes could flow in both directions between systems reliably.
- Wrote integrations with GitLab's API to handle user provisioning automatically instead of doing it manually for each new team member.
- Added role-based rendering to the frontend so users only see what they're allowed to access. This covered menus, buttons, and data visibility.
- Ran security scans, identified vulnerabilities, and patched them. Kept dependencies up to date and followed OWASP practices.

Key Achievement: 2023 Individual Achievement Award for outstanding performance and impactful contributions.

Software Developer - Full Stack

Ubix Systems Marketing Pvt Ltd | Sep 2017 - Dec 2021 | Bengaluru, India

Projects: Live Impact, Workflow, Live Scheduler, Csv Tool, Xlsx Tool

- Built a monitoring dashboard from scratch that collected and displayed real-time data from multiple sources.
- Integrated Braintree as the payment gateway. Transactions became noticeably faster and we saw fewer payment failures after the switch.
- Wrote the REST APIs that powered both our internal admin tools and the client-facing app. Kept them well-documented and easy to consume.
- Automated the client onboarding flow that used to take hours of manual work. Brought it down to a few clicks with scripts and workflow automation.
- Handled server migrations, OS upgrades, and security patches on my own. Managed to do all of them without any downtime.

Key Achievement: Team Player Award 2020 for significant contributions to the organization's growth.

AWARDS AND CERTIFICATIONS

- Award: 2023 Individual Achievement Award, T-Systems
- Award: Team Player Award 2020, Ubix Systems
- Certification: Node.js - The Complete Guide (Udemy)
- Certification: Java Programming Masterclass (Udemy)
- Certification: Docker and Kubernetes - The Complete Guide (Udemy)
- Certification: AWS Cloud Practitioner Essentials (Coursera)
- Completed Internship at Pixzee Technology (6 Months)

EDUCATION

Master of Computer Applications (MCA) | East West Institute of Technology | 2015 - 2017

Bachelor of Computer Applications (BCA) | Sri Jagadguru Renukacharya College | 2012 – 2015

ADDITIONAL INFORMATION

Languages: English, Kannada, Tamil, Hindi.
